

10 Reasons Your RMM Falls Short Without Apple MDM: What MSPs Need for Complete Device Management

As Apple devices gain popularity among clients, MSPs must go beyond traditional RMM tools to meet client expectations. Managing Apple devices requires more than basic monitoring—it demands a robust Mobile Device Management (MDM) solution tailored for macOS and iOS.

Legacy MDM platforms often lack the real-time capabilities, automation, and multi-tenancy that MSPs need to deliver seamless Apple device management. Addigy bridges this gap by combining MDM functionality with RMM capabilities, empowering MSPs to manage Apple devices with confidence.

Here's how Addigy compares to your current RMM solution:

Feature	Traditional RMM	Typical MDM	Addigy
 MDM/DDM	✗	✓	✓
 Real-Time Monitoring and Remediation	✓	✗	✓
 True Multi-Tenancy for MSPs	✓	✗	✓
 Rapid Device Apple Onboarding (<5 minutes)	✗	✗	✓
 Seamless PSA Integration	✓	✗	✓
 Automated Apple Compliance Maintenance	✗	✗	✓
 Scalable Apple Management	✗	✓	✓
 Flexible, No-Commitment Terms	✗	✗	✓
 Industry-Leading Support	✗	✗	✓
 Apple Revenue Growth Opportunities	✗	✗	✓

Why Addigy's MDM is Essential for MSPs

Addigy combines MDM functionality with RMM capability to provide a complete solution for managed service providers. Unlike traditional RMM tools who only focus on windows and traditional MDM platforms who only focus on the enterprise, Addigy is built specifically for MSP workflows.

- **Proactive Device Management:** Real-time monitoring and remediation ensure client satisfaction.
- **Zero-Touch Deployment:** Quickly onboard new devices with minimal effort.
- **Seamless Integration:** Streamline workflows with PSA tools like ConnectWise and Autotask.
- **Compliance Leadership:** Automate compliance checks and updates to reduce risks.
- **Scalable Multi-Tenancy:** Manage multiple clients centrally without sacrificing privacy or control.
- **Real-Time Remote Capabilities:** Securely assist your end users.

Don't let outdated tools hold you back. Upgrade to Addigy's integrated MDM platform today and deliver the Apple device management your clients expect.
